

How We Help

Got a question? Ask A PT

Many of our clients at KINETIC PHYSICAL THERAPY feel like they have already tried everything. They've seen their doctor, even a specialist. They have exhausted natural remedies and endured painful shots. They have taken prescription pain medications that mask the problem and may have been told that surgery is in the future.

Many of our clients even worked with traditional physical therapy in the past, and although they found improvement, they are left with lingering issues. That's where we step in. If you are not sure how we can help, ask! We are here to help guide you in making the best choice for your self.
